 - A. Hiatal hernia
 - B. Umbilical hernia
 - C. Inguinal hernia
 - D. Ventral hernia

4. Atrial fibrillation causes an irregular heartbeat, sometimes rapid, and often requires anticoagulation medicine to prevent stroke:
 - A. TRUE
 - B. FALSE

5. The three most common diseases seen in healthcare are:
 - A. Hypertension, hyperlipidemia, Rheumatoid Arthritis
 - B. COPD, Crohn's disease, Diabetes
 - C. Sleep apnea, CVA, peptic ulcer disease
 - D. Hypertension, Diabetes, Hyperlipidemia

6. Enlargement of an artery due to weakness of the arterial wall is called:
 - A. DVT
 - B. Embolus
 - C. Aneurysm
 - D. Ischemia

7. Which of the following is NOT a condition involving the thyroid gland:

- A. Goiter
- B. Grave's disease
- C. Thymoma
- D. Hashimoto's disease

8. When the stomach process food more slowly than normal, it is called:

- A. Gastritis
- B. GERD
- C. H.Pylori
- D. Gastroparesis

9. Which of the following is NOT a neurologic problem:

- A. Multiple sclerosis
- B. Myasthenia Gravis
- C. CVA
- D. Peripheral Neuropathy
- E. Parkinson's disease
- F. Polycythemia Vera

10. All of the following are bone or joint disorders EXCEPT:

- A. Psoriasis
- B. Osteoporosis
- C. Osteopenia
- D. Osteoarthritis
- E. Paget's disease

11. All of the following are skin-related diseases EXCEPT:

- A. Melanoma
- B. BPH
- C. Urticaria
- D. Scleroderma
- E. Basal Cell carcinoma
- F. Xanthoma

12. The type of hernia that causes GERD and it's complications:

- A. Ventral hernia

- B. Inguinal hernia
- C. Hiatal hernia
- D. Umbilical hernia

13. The symptom of “mania” is part of what condition:

- A. Generalized anxiety
- B. Schizophrenia
- C. Chronic depression
- D. Bipolar disorder

14. Which of the following is NOT an autoimmune disease:

- A. SLE (lupus)
- B. Osteomyelitis
- C. Primary biliary cholangitis
- D. Rheumatoid arthritis
- E. Psoriatic arthritis
- F. Sjogren’s syndrome

15. Which of the following does not directly affect the liver:

- A. Autoimmune hepatitis
- B. NAFLD
- C. NASH
- D. Ehlers Danlos syndrome
- E. Primary sclerosing cholangitis

16. Which of the following is treated by performing a Nissen fundoplication:

- A. Umbilical hernia
- B. Rectocele
- C. Ovarian cyst
- D. Hiatal hernia
- E. Aortic aneurysm

17. Lateral internal sphincterotomy is a method to treat which of the following:

- A. Hemorrhoids
- B. Coronary artery occlusion
- C. Chronic anal fissure
- D. Hip fracture

18. When a woman elects for surgical contraception after deciding she is done having children, she has a:

- A. Hysterectomy
- B. Endometrial ablation
- C. Vulvectomy
- D. D&C
- E. Bilateral tubal ligation

19. If vaginal childbirth is too dangerous to allow/perform, a Gynecologist will instead perform:

- A. Caesarian section
- B. Cholecystectomy
- C. Bladder resuspension
- D. Abdominoplasty

20. If a patient has severe, unexplained abdominal pain and needs emergency surgery to determine the cause, he/she is most likely to have:

- A. Colostomy
- B. Colonoscopy
- C. Exploratory laparotomy or laparoscopy
- D. Episiotomy

21. The technique of "open reduction-internal fixation" is used by what type of surgeon:

- A. Orthopedic surgeon
- B. Vascular surgeon
- C. Gynecologist
- D. Neurosurgeon

22. Which of the following is a surgery to help someone lose weight (bariatric surgery):

- A. Lap-band gastroplasty
- B. Roux-en-Y gastrojejunostomy
- C. Sleeve gastrectomy
- D. Pancreatico-biliary diversion
- E. All of the above

23. Coronary artery bypass graft surgery (CABG) is typically performed when a patient has multiple coronary arteries diseased by plaque:

- A. TRUE
- B. FALSE

24. A patient with life-threatening heart rhythm disturbance is likely to be treated with:

- A. Pacemaker
- B. CABG
- C. Porcine aortic valve
- D. Defibrillator
- E. Coronary stent placement

25. A case of small bowel obstruction is most likely to be remedied by what surgical procedure:

- A. Nissen fundoplication
- B. Partial colectomy
- C. Lysis of adhesions
- D. Inguinal hernia repair

26. Breast cancer may be treated by which surgery/surgeries:

- A. Hysterectomy
- B. Mastectomy
- C. Lumpectomy
- D. Mediastinoscopy
- E. B & C

27. The most common reason a patient needs to have a nephrectomy:

- A. Bladder cancer
- B. Uterine cancer
- C. Kidney stones
- D. Renal cell cancer

28. A "nose job" is also called:

- A. Septoplasty
- B. Salpingectomy
- C. Rhinoplasty
- D. TURP

29. Pancreatic cancer is often treated by which surgery:

- A. Mohs surgery
- B. Tupet fundoplication
- C. Whipple procedure
- D. Transanal excision

30. An ileal carcinoid tumor would be treated by which surgery:

- A. Lysis of adhesions
- B. Total colectomy
- C. Segmental small bowel resection
- D. Lithotripsy
- E. Laminectomy
